ACADEMIC PROJECTS

Retail Intelligence Platform

Big Data | PySpark | Kafka | Machine Learning

Duration : 2 Months

Developed an end-to-end Retail Intelligence Platform using AWS S3, Hadoop HDFS, Apache Spark (PySpark), Apache Kafka, Apache Airflow, and Streamlit. Implemented a Lambda Architecture with Bronze-Silver-Gold Medallion data pipelines to process historical batch data and real-time streaming data. Built ML-ready feature stores, trained predictive machine learning models using Gold-layer datasets, and developed an interactive Streamlit dashboard for business analytics and operational insights.

SmartHire AI Interview Platform

Full Stack Web Development

Duration : 6 Months

Developed a full-stack AI interview platform using React.js, TypeScript, Supabase, and PostgreSQL to simulate technical and HR mock interviews. Implemented secure user authentication, interview session management, and personalized performance feedback through an interactive and responsive web application.
